-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4-9,11-15,17-28,30-32 and 34-36 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 5,6,12,13,25,26,35 and 36 is/are allowed.
- 6) ☒ Claim(s) 1,2,4,7-9,11,14,15,17-24,27,28,30-32 and 34 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4, 7-9, 11, 14, 15, 17, 18, 19-21, 22-24, 27, 28, 30, 31, 32, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR 2303711 in view of Fowler.

FR 2303711 discloses having an arcuate structure wherein the archway has u-shaped cross-section that has components running through it. See page 3, lines 34-page 4, line 10 and figures 3 and 4. FR 2303711 is silent on the system components that run through the hollow archway so that instruments from the lower portion and upper crown portion can communicate with each others. However, FR 2303711 is silent on the system components running through his hollow archway. Fowler teaches that system components that run thru a hollow passageway is well known in the art.

It would have been obvious to one skilled in the art at the time the invention was made to have ran system components through FR 2303711's hollow archways as taught by Fowler to accommodate the passengers. Please note that the use of support system components in the upper and lower lobe portions are well known in this day and age. Plus it is obvious to one skilled in the arts to use support components in the upper and lower portion to accommodate the passengers.

Art Unit: 3644

Please note that to make a passageway integral merely involves a routine step that one skilled in the art would have taken.

Re claims 22-23, please note that the archway can be used as a divider since a person skilled in the art would put a marker in the archway to designate one end as the front and the other end as the back. Thus an archway that runs through the fuselage would divide the portions of the aircraft into different portions.

Allowable Subject Matter

Claims 5, 6, 12, 13, 25, 26, 35, and 36 are allowed.

Response to Arguments

Please note that the inverted structure are arranged substantially perpendicular to the length direction of the fuselage. FR 2303711 clearly shows this claimed subject matter.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Fowler is there to show that running components through a hollow arcuate structure is very well known in the art. One skilled in the art would certainly run components through the

Art Unit: 3644

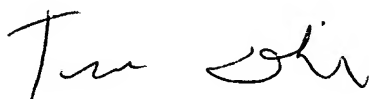

arcuate structure of FR 2303711 as taught by Fowler so as to safely route the components and to hide them from view so as to make the aircraft cabin more aesthetically beautiful and to prevent passengers from touching the components.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 571-272-6899. The examiner can normally be reached on 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 571-272-7045. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
